

First of all, install a VirtualBox and install a the ubuntu server that can be found in there site

Secondly Configure the Virtual Box to these specifications

Virtual Machine Specifications

Configure a virtual machine with the following minimum specifications:

Component	Minimum Requirement
Name	Ubuntu-Server-Week03
RAM	4 GB
CPU	2 Virtual Processors
Storage	40 GB (VDI/VMDK)
Network	NAT (or Bridged if instructed)
Optical Drive	Ubuntu Server ISO

And if these options appeared to you select the options in this guide
